Août 2009

welcome.

Our Mission

Is our Mission our Passion or is our Passion our Vision?

It's hard to say. It's probably both.

It all relates back to be passionate about being involved in show productions for Concert Touring, Television, Theatre and Corporate Events for many years in the past and for hopefully many years in the future.

Giving feedback to various lighting equipment manufacturers, asking for enhancements and new product developments and product releases is one thing, doing it ourselves is the other.

Welcome, dear Customer, to the world and products of Laser Imagineering.

We do listen to you and your ideas carefully.

We do customized engineering upon your request and in close relation with your project ideas.

We stick to deadlines and promises.

We re-act with immediate attention and direct approach.

We manufacture in small batches and its all certified and 'Made in Germany'.

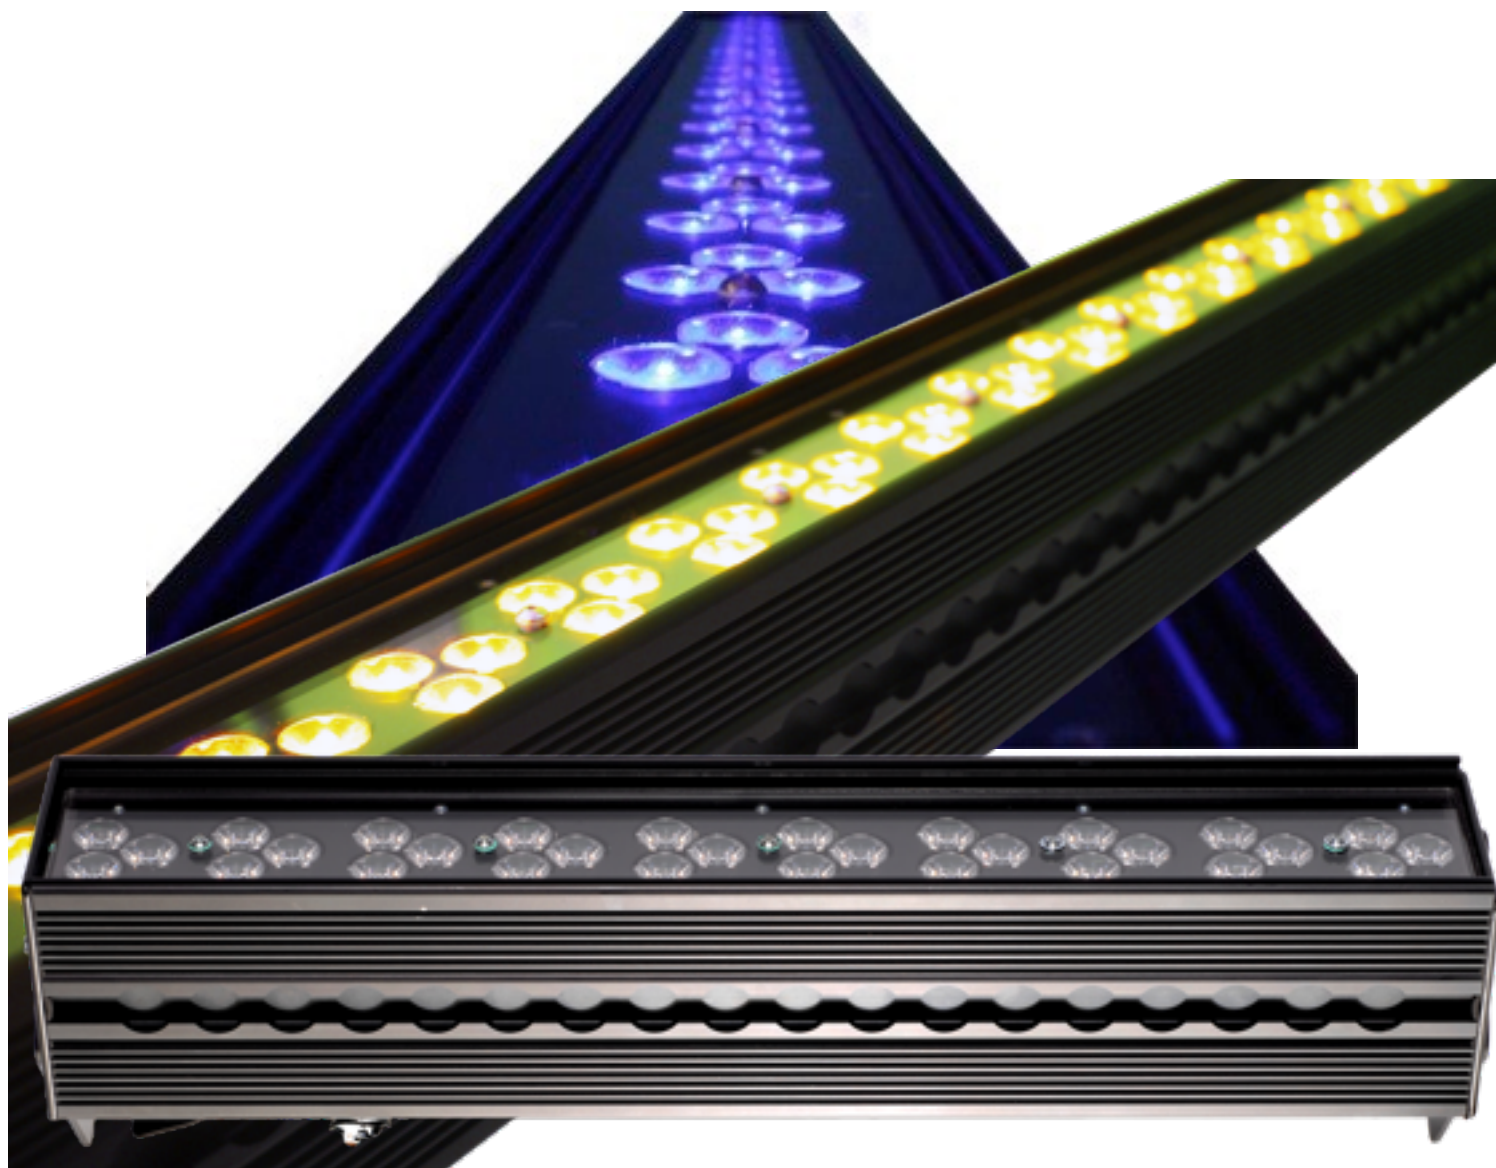

We develop and engineer using high-quality equipment.

We sell with personal touch and care and have highly attractive price offerings.

When can we talk to you?

We hope to see you soon.

Best regards from
The Laser Imagineering Sales Team
